## The demography of dementia across the world

Professor Hafiz T.A. Khan, PhD

The Graduate School /
College of Nursing, Midwifery and Healthcare
University of West London, UK

&

Oxford Institute of Population Ageing University of Oxford

**6 January 2018** 

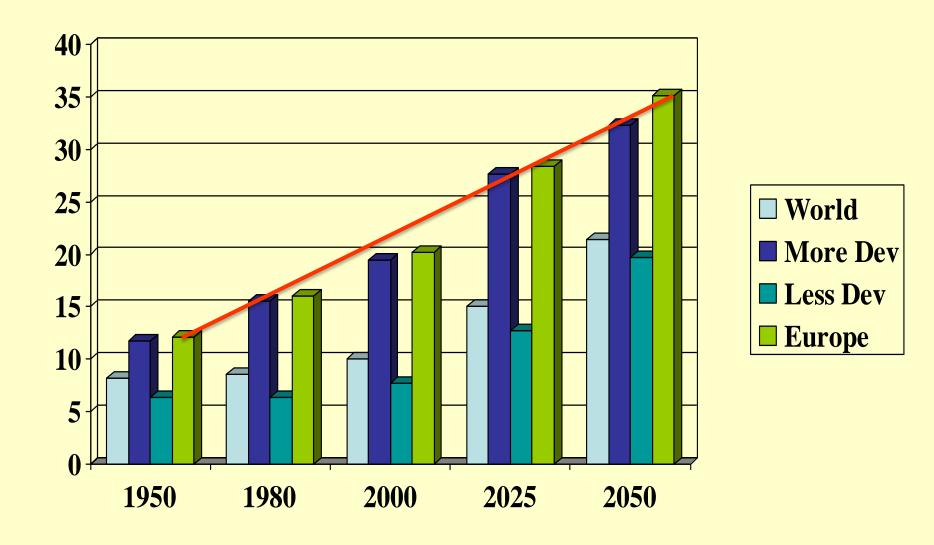

## **Population Ageing**

Population change is quite dramatic in many places.

 The share number of people aged 60+ is increasing faster than what we often thought.

 Population pyramid can give us a clear picture about population changes over time for a country.

# 1950-2050 Population 60+ %

# 1950-2050 Population 80+ %

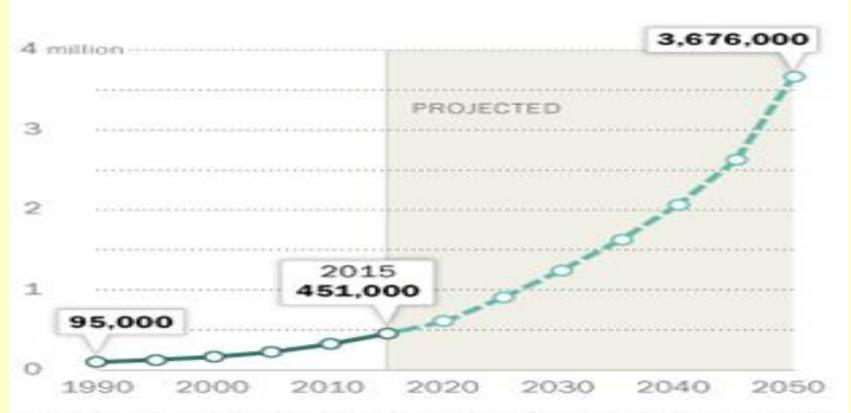

# Centenarians

#### The world's centenarian population projected to grow rapidly

Number of persons ages 100 and older

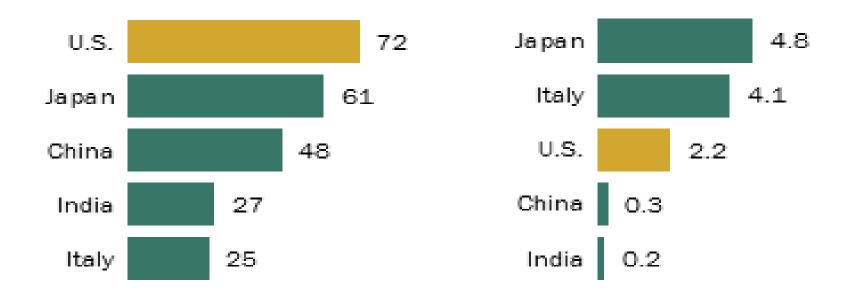

Source: United Nations, Department of Economic and Social Affairs, "World Population Prospects: 2015 Revision"

## **Centenarians Globally**

# U.S. has the most centenarians overall in 2015, but fewer per capita than other top countries

Number of persons ages 100 and older, in thousands Number of persons ages 100 and older per 10,000 people

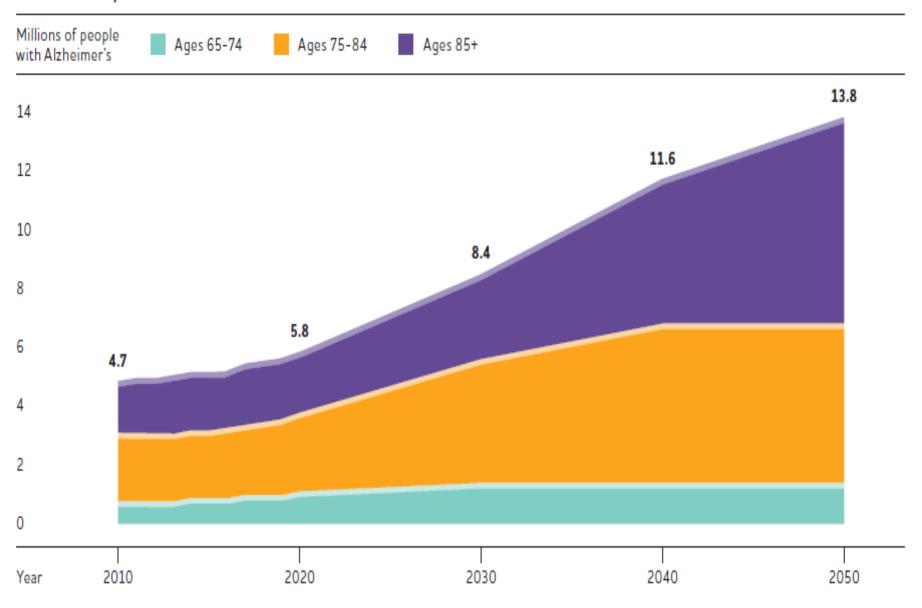

Note: These five countries had the most centenarians in 2015.

## Conclusion

 Prevalence of dementia is associated with age, gender and geographical region.

 Policy planning is needed now in order to provide appropriate care to people with dementia.
