Table 1

Correlations and descriptive statistics among main study variables.

Variables	1	2	3	4	5	6	7
1. PC/ laptop ownership	---	.04**	.01	.13**	.18**	.10**	.06**
2. Internet access bedroom		---	-.14**	-.03*	.13**	.09**	.07**
3. Instructive mediation			---	.51**	-.13**	-.05**	-.05**
4. Restrictive mediation				---	.44**	.12**	.11**
5. Online disclosure					---	.32**	.28**
6. Sexualized communication						---	.61**
7. Request for sexual material							---
Mean			2.42	1.63	1.19	0.53	0.22
SD			1.18	1.19	1.18	0.77	0.58

Note. The correlations among continuous variables, namely instructive mediation, restrictive mediation, online disclosure, sexualizes communication, and request for sexual material, were computed by Pearson's bivariate correlations; correlations between binary variables, namely PC/ laptop ownership and Internet access bedroom, and continuous variables were computed by point-biserial correlations.

* $p < .05$. ** $p < .01$.
